JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 9, Number 1 January-February, 1968

CONTENTS

	Engl.	Russ.
Degenerate Solutions of Electron-Beam Equations—V. N. Danilov	1	3
Structure of a Viscous Isoelectron Thermal Discontinuity in a Plasma—V. S. Imshennik	7	13
A Theory for Freezing of Electron Processes in Low-Temperature Plasma Jets —A. B. Vasil'eva and Yu. S. Sayasov	15	26
Instability of a Layer of Lightly Ionized Plasma in Crossed Electric and Magnetic Fields —K. I. Kim	20	35
The Hydrodynamics of a Ferromagnetic Fluid—V. M. Zaitsev and M. I. Shliomis	24	41
Indeterminacy and Stability of the Detonation Mode in a Bounded Medium —N. M. Kuznetsov	27	45
Some Characteristics of the Ablation of Decomposing Materials—Yu. A. Buevich and M. I. Yakushin	34	56
Determination of Elasticity Constants for Microheterogeneous Media—V. V. Bolotin and V. N. Moskalenko	41	66
Motion of a Solid Containing a Spherical Damper—F. L. Chernous'ko	45	73
Flow Past a Thin Axisymmetric Body with a Given Velocity Distribution Along Part of Its Surface—D. G. Taits	49	80
Investigation of Boundary-Layer Turbulence in the Eddy Zone Behind a Bluff Body —V. V. Orlov	53	86
Cavitational Flow of a Ponderous Fluid Over a Smooth Arc—L. I. Mal'tsev	55	88
Obtaining High Pulsed Pressures—V. G. Belan, A. E. Voitenko, and A. I. Ivanchenko	60	95
Calculation of Continuum Radiative Energy Transfer with Allowance for the Variation of the Absorption Coefficient with Frequency and Reabsorption—I. S. Voronina, V. P. Zamuraev, and V. G. Sevast'yanenko	62	98
Effect of Surface Impurities on Energy Transfer during Atomic Adsorption —V. V. Mazhuga	65	102
A Model of a Porous Body at High Temperatures—S. P. Detkov	67	105
Kinetic Coefficients of a Multicomponent Nonisothermal Plasma—A. Yu. Kirii and V. P. Silin	72	112
Measurement of the Electron Concentration in a Plasma Generated by a High-Velocity Electron Beam—A. V. Kolosov	73	114
Heat Losses in a Pulsed Plasma Accelerator—A. M. Rushailo	75	117
Some Energy Characteristics of the Induced Interaction of Moving Conducting Walls with External Electric Windings for Finite R_m—V. I. Yakovlev	83	123
Nonsteady Streamlining of a Cylinder by an Incompressible Conductive Fluid —V. I. Tokatly	92	131
Formation of Shock Waves by an Electric Discharge in Water—A. I. Ioffe and K. A. Naugol'nykh	96	134

CONTENTS

(continued)

	Engl.	Russ.
A Similarity Criterion for Electrical Discharge in Gases—G. Yu. Daumov	101	137
Ionization Relaxation behind the Front of a Shock Wave in Argon with Air Impurities —G. I. Kozlov, Yu. P. Raizer, and D. I. Roitenburg	104	140
Effect of a Joint on the Magnetic Field of a Long Ferromagnetic Rod—V. A. Bystrov	112	145
The Equations of Turbulent Flow for an Incompressible Fluid—G. F. Filippov	114	146
Viscosity of NaCl in Shock Compression—I. V. Belinskii and B. D. Khrismoforov	116	150
Experimental Determination of the Drag Coefficient of a Liquid Droplet in the Process of Deformation and Breakup in a Turbulent Gas Flow —B. P. Volgin and F. S. Yugai	118	152
The Thermal Theory of Ignition—A. M. Grishin	121	156
Nonuniqueness of the Stationary Solution to Combustion-Theory Equations with a Constant Ratio of Thermal Conductivity and Diffusion Coefficients —R. D. Bachelis and V. G. Melamed	124	161
Joule-Thomson Coefficient and Speed of Sound—E. P. Sheludyakov	128	167
Elastic Oscillations of a Current-Carrying Rod in a Longitudinal Magnetic Field —V. V. Prudnikov	129	168
Compression and Buckling of Rods in Creep under Constant Loads and at Monotonically Increasing Temperatures—O. V. Sosnin and N. G. Torsheno	132	172

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 9, Number 2 March-April, 1968

CONTENTS

	Eng.	Russ.
Calculating the Parameters of an Electron Beam that Drifts Across a Strong Homogeneous Magnetic Field—V. N. Danilov	135	3
Calculations for a Cylindrical Electric Arc with Allowance for Energy Transfer by Radiation with the Hydrogen at a Pressure of 100 atm—A. T. Onufriev and V. G. Sevast'yanenko	144	17
A Model of the Steady-State Motion of Suspensions—Yu. A. Buevich and A. I. Leonov	148	23
Ignition of Solid Propellants—V. B. Librovich	156	36
Thermoelasticity Constants of Polycrystals—V. V. Bolotin and V. N. Moskalenko	161	44
Elasticity Constants of Axial Textures in the Voigt-Reuss-Hill Approximation —K. S. Aleksandrov and I. P. Talashkevich	164	48
Some Cases of Acceleration of a Magnetohydrodynamic Shock Wave—A. E. Voitenko and O. P. Sobolev	166	51
Recording Arc Discharges at the Cathode in Models of MHD Devices—Yu. A. Baryshev, V. O. German, Yu. P. Kukota, G. A. Lyubimov, and B. V. Parfenov	168	54
Some Effects Resulting from the Anisotropy of the Electrical Conductivity in a Gas-Discharge Plasma—Ya. S. Uflyand and I. B. Chekmarev	170	56
An Investigation of the Nonsteady Interaction of a Conducting Gas Cloud with a Given Electrical Circuit—V. A. Derevyanko, L. A. Zaklyaz'minskii, S. S. Katsnel'son, A. Yu. Kerkis, E. F. Lebedev, N. A. Trynkina, and V. P. Fomichev	173	59
Some Calculations Relating to the Physicochemical Processes in a Plasma Jet for Constant and Fluctuating Initial Conditions—E. N. Chervochkin	178	67
Characteristics of a Plasmatron with Transpiration Cooling of the Anode —V. N. Yarygin	181	72
Unsteady Radiative Heating of a Cylindrical Body—A. L. Burka	184	76
The Possibility of Measuring Turbulence by a Correlation Method—N. F. Derevyanko	187	80
Stability of Periodic Waves of Finite Amplitude on the Surface of a Deep Fluid —V. E. Zakharov	190	86
Investigation of Flow Past a Sphere in Free Flight—A. P. Bedin, I. M. Dement'ev, and G. I. Mishin	195	95
The Flow of a Viscous Liquid Past a Doubly Periodic Row of Cylinders —A. M. Golovin and V. A. Lopatin	198	99
Flow of a Viscous Fluid Around a Sphere of Finite Radius—Yu. G. Ovseenko	202	106
Immiscible Fluid Displacement in Nonlinear Seepage Flow—M. G. Bernardiner and V. M. Entov	205	110
Regular Reflection of Plane Detonation Waves from an Elastic Half-Space —V. V. Skripachev	208	115
Nonsteady-State Propagation of a System of Cracks in a Brittle Material —V. M. Kuznetsov	210	118

CONTENTS

(continued)

	Engl.	Russ.
Underlying Assumptions of the Theory of Diffusional Creep—K. K. Ziling	216	127
Elasticity and Creep of Glass-Reinforced Plastic 27-63s at Elevated Temperatures —G. I. Bryzgalin	218	131
Calculation of Contact Temperatures Generated by the Rotation of a Shaft in a Bearing —V. A. Babeshko and I. I. Vorovich	221	135
Estimating the Thermal-Conductivity Coefficients of Multiphase Materials —V. M. Levin	223	137
Measurement of the Speed of Sound and Calculation of Entropy in Freon-11 —Ya. L. Kolomov, A. N. Solov'ev, and E. P. Sheludyakov	225	141
Measurement of the Surface Tension of Alcohol-Water Solutions by the "Two-Jump" Method—A. A. Kiriyanenko and A. N. Solov'ev	228	145
Experimental Investigations of the Compressibility of Argillaceous Soils Subjected to Underground Explosions—G. V. Rykov	231	149
Variation of Well Pressure and Flow Rate in a Porous-Fractured Reservoir —R. I. Medvedskii	233	151
A Note on the Flushing Process in Saline Soil—V. I. Pen'kovskii and V. A. Postnov	237	158

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 9, Number 3 May-June, 1968

CONTENTS

	Eng./Russ.	
A High-Frequency High-Pressure Gas Flow Discharge as a Slow Combustion Process—Yu. P. Raizer	239	3
Equilibrium and Stability in a High-Current Discharge in a Dense Plasma under Conditions of Radiative Conduction—A. A. Rukhadze and S. A. Triger	244	11
Wall Conduction in a Highly Magnetized Plasma—A. I. Morozov	249	19
Theory of Early Onset of Turbulence in a Dispersion—Yu. A. Buevich and V. M. Safrai	252	23
Motion of a Pair of Bubbles in a Liquid of Low Viscosity—A. M. Golovin and A. G. Petrov	256	29
Theory of the Elastic Moduli of a Heterogeneous Medium—A. G. Fokin and T. D. Shermergor	260	37
A Model of an Elastic-Plastic Medium with Delayed Yield—Yu. N. Rabotnov	265	45
Delayed Yield in Steels (Review)—Yu. V. Suvorova	270	55
Modes of Stability Loss in an Elastic Rod Under Impact—V. M. Kornev	275	63
Electrical Phenomena on Exposing a Cable to Neutrons and Gamma Rays —R. M. Zaidel	278	66
Primary and Secondary Processes in the Nanosecond Range in the Production of a Discharge in a Short Gas Gap—G. A. Mesyats, A. M. Iskol'dskii, V. V. Kremnev, L. G. Bychkova, and Yu. I. Bychkov	285	77
Oscillation of a Conducting Gas in a Periodic Electromagnetic Field —L. A. Zaklyaz'minskii and A. N. Cherepanov	288	81
High Current and High-Frequency Arcs in a Plasma Source—V. A. Bogatyreva, N. I. Vorob'eva, M. F. Zhukov, and Yu. I. Sukhinin	291	86
Drift Instability in a Plasma—N. S. Buchel'nikova, R. A. Salimov, and Yu. I. Eidel'man	293	89
State of Argon behind a Shock Wave at Mach Numbers from 20 to 50, with Allowance for Excitation, Multiple Ionization, and Coulomb Interaction—G. I. Kozlov and E. L. Stupitskii	296	94
Speed and Shape of Air Bubbles in Water—I. V. Belov and E. V. Prokolov	299	98
Jet Flow around a Plate near a Wall—F. S. Vladimirov	303	104
Oscillation in the Flow of a Polymer Melt from a Capillary—A. V. Karakin and A. I. Leonov	307	110
Distribution of Suspended Particles in a Fluidized Bed—V. P. Myasnikov	310	115
Motion of Noninertial Spherical Particles in a Curvilinear Flow of a Viscous Liquid at Small Reynolds Numbers—A. A. Kirsh	314	121
The Lower Limit to the First Critical Heat Flux in Weak Gravitational Fields —Yu. A. Kirichenko and P. S. Chernyakov	316	123
Interaction of a Quasi-Stationary Laser Beam with a Metal—B. M. Zhiryakov, A. K. Fannibo, and N. N. Yuryshev	318	126

CONTENTS

(continued)

	Engl.	Russ.
A Model for the Permanent Transient State in the Combustion Zone for a Mixed Condensed System—S. S. Novikov, P. F. Pokhil, Yu. S. Ryazantsev, and L. A. Sukhanov	320	128
Formation of a Condensation Aerosol at High Supersaturations—A. G. Sutugin and N. A. Fuks	323	134
Heat Transfer in Turbulent Natural Convection on a Vertical Permeable Surface —P. M. Brdlik and V. A. Mochalov	328	143
Acoustic Dispersion and the Ultrasound Absorption of Freon Vapor—S. G. Komarov, A. N. Solov'ev, and E. P. Sheludyakov	331	148
Convective Heat Transfer in Response to a Sonic Field in Saturated Sand —O. L. Kuznetsov, L. A. Sergeev, and E. M. Simkin	333	150
A Channel above a Flow of Groundwater Along an Inclined Water Table—V. N. Emikh and E. M. Emikh	335	153

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 9, Number 4 July-August, 1968

CONTENTS

	Eng.	Russ.
Joule Loss due to Compressibility of Gas in a Channel of Variable Section —A. B. Vatazhin	341	3
Self-Similar Solutions of Three-Dimensional Laminar Magnetohydrodynamic Boundary-Layer Equations—G. V. Filippov and V. G. Shakhov	348	10
Self-Similar Plane Motions of a Heat-Conducting Gas Heated by Radiation—V. M. Krol'	358	18
Propagation of Perturbations in a Liquid Containing Gas Bubbles—V. K. Kedrinskii	370	29
Nonlocal Effects under Elastic Percolation Conditions in Deep-Lying Strata —V. N. Nikolaevskii	377	35
The Boundaries of the Effective Elastic Moduli for Inhomogeneous Solids—A. G. Fokin and T. D. Shermergor	381	39
Solution of Certain Variational Problems of Thermal Resilience for Thin Shells Considering the Selection of Optimum Conditions for Localized Heat Treatment —E. I. Grigolyuk, Ya. I. Burak, and Ya. S. Podstrigach	389	47
A Fragmentation Problem for an Elastic Plate—N. I. Shishkin	397	55
Explosion-Induced Plane Shock-Waves Attenuation in a Solid Body—V. N. Kondrat'ev, I. V. Nemchinov, and B. D. Khristoforov	403	61
Experimental Data on Stress-Wave Parameters in the Earth Due to Underground and Surface Explosions—V. D. Alekseenko and G. V. Rykov	409	65
Viscous Properties of a Soil—G. M. Lyakhov	412	68
Mechanism of Destruction of Semitransparent Polymers by a Radiant Heat Flux —Ya. A. Buevich, O. K. Egorov, and M. I. Yakushin	417	72
Contribution to the Theory of Thermal Interaction between the Powder Combustion Zone and the Powder-Metal Contact—S. S. Novikov and Yu. S. Ryazantsev	424	79
Quasi-Steady Evaporation of a Drop with Internal Heat Release—F. G. Volkov and A. M. Golovin	429	83
Acoustic Oscillations in a Cavity with Sources and Sinks—Yu. I. Babenko and O. M. Todes	434	87
Laminar Boundary Layer on a Flat Plate in an Oscillatory Flow—I. V. Pushkareva	441	93
Entrance Length in Turbulent Flow of Gas in a Cylindrical Tube in Highly Nonisothermal Conditions—A. I. Leont'ev, B. P. Mironov, and A. V. Fafurin	449	99
Investigation of Turbulence by Optical Methods—N. F. Derevyanko and A. M. Trokhan	455	105
Visualization of Supersonic Flows by Means of a Prebreakdown Discharge—V. I. Alferov and B. V. Kalachev	468	117
An Experimental Investigation of Electrode Effects—Yu. V. Baryshev, V. O. German, B. V. Parfenov, and B. S. Solov'ev	471	119
Characteristics of a Stabilized Arc in a Channel with a Distributed Gas Feed —G. M. Mustafin	476	124
Similar Solutions of the Magnetohydrodynamic Equations with Finite Gas Conductivity —A. N. Cherepanov	482	130

CONTENTS

(continued)

	Engl.	Russ.
Experimental Investigation of the Reflection of a Shock Wave from a Current-Carrying Grid—V. A. Derevyanko, L. A. Zaklyaz'minskii, and E. F. Lebedev	489	136
Calculation of a Tubular Electron Beam in an Axisymmetric Magnetic Mirror —V. N. Danilov	495	141
Investigation of Ion-Cyclotron Instability in a Potassium Plasma—N. S. Buchel'nikova, R. A. Salimov, and Yu. I. Éidel'man	504	149
Characteristics of the Stages of an Ion-Convection Pump—Yu. S. Bortnikov, V. A. Nesterov, and I. B. Rubashov	511	154
Differential Method of Measuring Specific Heat of Metals during Their Rapid Heating —O. A. Kraev and R. A. Fomin	516	159
Intersection of Temperature Dependences of Velocity of Sound in Liquid and Vapor Phases of Freon-12 on Saturation Line near Critical Point—S. G. Komarov, A. N. Solov'ev, and E. P. Sheludyakov	518	160
Heat Transfer Coefficient in Turbulent Flow of Heat-Releasing Liquid—D. A. Kazenin	520	161
Solution of a Problem in Transient Groundwater Filtration by Monte Carlo Methods —V. N. Émikh	522	163

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 9, Number 5 September-October, 1968

CONTENTS

	Eng./Russ.	
The Paraxial Approximation for a Dense Electron Beam—V. N. Danilov	529	3
The Nonlinear Theory of Electromagnetic Wave Attenuation in Plasmas —N. S. Erokhin and R. K. Mazitov	535	11
Equilibrium and Stability Theory of a Power Discharge in a Dense Optically Transparent Plasma—V. B. Rozanov, A. A. Rukhadze, and S. A. Triger	539	18
Linear Approximation for the Flow of a Conducting Gas with a High Magnetic Reynolds Number through a Channel—A. G. Korsun	544	26
Self-Similar Motion of a Gas Heated by a Nonequilibrium Continuous Radiation Spectrum—V. M. Krol and I. V. Nemchinov	548	32
Thermal Explosion during the Flow of a Viscous Liquid—S. A. Bostandzhiyan, A. G. Merzhanov, and N. M. Pruchkina	552	38
Relaxation-Type Self-Oscillations Arising during Burning of Powder in a Half-Closed Volume—G. N. Gusenkov	556	44
Method for Designing Explosion Chambers—A. F. Demchuk	558	47
The Method of Effective Energy in the Problem of a Powerful Explosion in a Real Gas —V. V. Lunev	560	50
Some Problems of the Polarization of Dielectrics in Shock Waves—A. N. Dremin, O. K. Rozanov, and V. V. Yakushev	562	53
Experimental Investigation of the Influence of a Magnetic Field on the Heat Transfer between an Argon Plasma Flow and the Channel Walls —V. I. Rozhdestvenskii	566	57
Influence of a Magnetic Field on a Nonisothermal Lubricating Film of a Conducting Gas —I. I. Shidlovskaya and V. P. Shidlovskii	569	62
Theory of Interaction of a Rarefield Gas with A Surface—A. A. Pyarnpuu	572	66
Determination of Partial Intensities of Components of a Molecular Flux —I. S. Borovkov, I. D. Vershinin, E. P. Pavlov, and V. M. Sankovich	576	72
Measurement of Velocity of Sound in Freons—Ya. L. Kolotov, A. P. Solov'ev, and E. P. Sheludyakov	579	76
Free-Convection Heat Transfer in a Spherical Volume—Yu. A. Kirichenko and V. N. Shchelkunov	581	78
Investigation of Heat Transfer in a Gas Flow in a Tube with Radiation Taken into Account —V. N. Vetlutskii and V. G. Sevast'yanenko	584	82
Propagation of Acoustic Waves in a Hereditary Elastic Medium—S. I. Meshkov and Yu. A. Rossikhin	589	89
Interaction between a Cylindrical Wave in Water and the Free Surface —B. V. Boshenyatov and B. I. Zaslavskii	593	95
Stability of Fluid Film on the Surface of a Rotating Cylinder—L. N. Maurin	596	98
Calculations for Cavitating Flows—V. N. Shepelenko	598	100

CONTENTS

(continued)

	Engl.	Russ.
A Frequency Method for Measuring Fluid Flow Velocity—N. F. Derevyanko, V. N. Latyshev, and A. M. Trokhan	602	106
Determination of the Reaction on a Contour in a Constant-Vortex Flow—A. G. Yarmitskii	605	109
Effect of Polymers on Pitot-Tube Readings—Yu. N. Alekseev and L. D. Zheltukhin	608	115
Hot-Wire Anemometer Study of the Structure of Polymer Solutions—G. I. Barenblatt, V. N. Kalashnikov, and A. M. Kudin	610	118
Determination of Well Influence Coefficients on the Basis of Perturbations of the Steady State—R. I. Medvedskii	613	122
Allowance for the Characteristics of the Bed and Saturating Fluid in Percolation Processes in Deformable Reservoirs—R. G. Isaev	615	125

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 9, Number 6 November-December, 1968

CONTENTS

	Eng./Russ.	
Plasma Diffusion in a Toroidal Stellarator—A. A. Galeev, R. Z. Sagdeev, and G. P. Fewers	617	3
Stationary Supersonic Nonequilibrium-Plasma Source—G. A. Luk'yanov	626	13
Stabilization of an Alternating-Current-Carrying Plasma Filament by a Quadrupole Magnetic Field—M. G. Nikulin	633	20
Formation of an Intense Charged-Particle Beam in the Neighborhood of a Curved Emitter—V. A. Syrovoi	641	28
Acceleration of a Conducting Gas in a Strong Nonstationary Electromagnetic Field —G. M. Bam-Zelikovich	648	36
Some Compression Flows in Nonaxisymmetric Ring Nozzles—L. N. Korotaeva and A. F. Sidorov	653	41
Dissolution of an Ellipsoidal Bubble in a Slightly Viscous Liquid—A. M. Golovin	659	48
Radiative and Convective Heat Transfer in a Plane Layer of Absorbent Curtain —S. S. Kutateladze and N. A. Rubtsov	667	57
Crack Growth under Cyclic Loads—G. P. Cherepanov	674	64
Calculation of the Motion in the Near Field of an Explosion in a Solid Medium —V. P. Koryavov and G. G. Vilenskaya	687	76
Stability of the Combustion Process in Elastic Combustion Chambers—V. V. Bolotin, V. N. Moskalenko, and Yu. N. Novichkov	698	86
The Behavior of Steel Shells when Charges of Explosive Detonate inside Them —A. G. Ivanov, S. A. Novikov, and V. A. Sinitsyn	706	94
Experimental Study of the Electromagnetic Field in the Near Zone of Explosions Produced by Solid Explosives—A. P. Boronin, V. A. Vel'min, Yu. A. Medvedev, and B. M. Stepanov	712	99
Group Properties of MHD Equations and Their Invariant Solutions—I. P. Gridnev	718	103
Determination of Joule Dissipation for a Liquid with Variable Conductivity Moving in an Inhomogeneous Magnetic Field—V. A. Buchin	723	107
Optical Properties of an Electrodeless-Discharge Plasma in an Air Flow —Yu. A. Buevich, V. M. Nikolaev, Yu. A. Plastinin, G. F. Sipachev, and M. I. Yakushin	727	111
Some Applications of Relaxation Theory of a Highly Ionized Hydrogen Plasma —B. S. Gordiets, L. I. Gudzenko, and L. A. Shelepin	734	115
A Numerical Solution of the Problem of Laminar Jet Development in a Channel —L. A. Vulis and K. E. Dzhaugashtin	740	120
Analysis of Shock-Wave Reflection from a Current Lattice—L. A. Zaklyaz'minskii	743	123
The Stabilization of Convective Fluid Stability in a Cubic Cavity by Rotation —A. P. Ovchinnikov and G. F. Shaidurov	749	129
Motion of Large Gas Bubbles Ascending in a Liquid—I. G. Malenkov	750	130

CONTENTS

(continued)

	Engl./Russ.	
Reduction of Turbulent Heat Transfer in Tube Flows of Low-Concentration Polymer Solutions—V. N. Kalashnikov, Yu. D. Raiskii, and A. Z. Temchin	755	134
Heat of Evaporation and Critical Parameters of the Alkali Metals—L. D. Volyak	759	137
Heat Transfer between a Surface and a Fluidized Bed—V. P. Myasnikov and M. S. Rozhdestvenskaya	762	139
Experimental Determination of the P-v-T Relationship for Vapors of Freon 21 —A. N. Solov'ev, E. P. Sheludyakov, and A. A. Shilyakov	769	145
Motion of a Particle in a Vortex Chamber—M. A. Gol'dshtik and V. N. Sorokin	773	149
Wave Evolution in a Nonuniform Disperse Medium—V. Ts. Gurovich and R. K. Mazitov	778	153
Two Modeling Problems for the Motion of an Aggressive Liquid in a Porous Medium —V. I. Pen'kovskii	781	155
Similar Solution of Problems of Nonstationary Gas Percolation Through a Bed with a Nonlinear (Two-Term) Resistance Law—L. M. Gadzhiev	786	159
